

Example ADT:

```
# Scored Set
# (unique items, ranked by a score
# associated with each item)
class zset:
    def add(score, item)
    def remove(item)
    def contains(item)
    def range_by_score(start, end)
    def size()
```

Bid transaction:

```
client.begin()
client.zset.add('ItemBids:7', 40, 'Alice')
client.zset.add('UserBids:Alice', 40)
client.commit()
```
