STAR WARS

7pm Remaining: **5**

 Purchase

`List[Event]`

`BoundedCounter`

```
// latency target: < 20ms
def load_page(event: UUID) = {
  val remaining = read_weak("{event}:tickets")
  // how accurate is this count?
  display("Remaining: ", remaining)
  // only allow purchase if tickets > 0
  if (remaining > 0)
    enable_purchase_button()
}
```
