## Example ADT:

```
# Scored Set
# (unique items, ranked by a score
# associated with each item)
class zset:
   def add(score, item)
   def remove(item)
   def contains(item)
   def range_by_score(start, end)
   def size()
```

## Bid transaction:

```
client.begin()
client.zset.add('ItemBids:7', 40, 'Alice')
client.zset.add('UserBids:Alice', 40)
client.commit()
```
